TIP TUESDAY

Some Fun (and Useful) Google Updates

Google adds more ease to their search engine

In Google Chrome, search for any of the following to access directly from Google:

- **Tic-tac-toe** - Play a quick game (or two) against the computer. And yes, you can actually win!
- **Solitaire** - When you click to play, you can choose between “Easy” and “Hard” to fit your level (or desire). You can also choose to have sound on or off.
- **What sound does a ___ make?** Fill in the blank with the name of an animal. Click the > to scroll through more options. Note: at this time, only fairly typical animals are available in this manner.

Classroom Uses? Yes! How about 3 minutes of decompression time after an intense lesson? Also, use the games as transition between activities. Use the sounds to respond to whole group questions -- for instance, play the (wise) owl for a correct answer.
